Bullitt's Mastoid Apparatus for Stereoscopic Roentgenography of the Mastoids

1. Elevator Handle
2. Elevator
3. Cassette Adjuster
4. Upright Plates

5. Cassette Centering Mark "C"
6. Tube Holder
7. Locking Handle
8. Plate Adjusting Handle

Stereoscopic Examination of the Mastoids becomes a simple and rapid procedure with the use of this apparatus.

Arranged to use Radiator Type Coolidge Tube, any make of 8 x 10 Cassettes and upon any Radiographic Table

Weight 48 lbs.

Height 18 in.

Width 20 in.

Breadth 12 in.

Descriptive literature and prices upon request.

Illustrating Final Results of Stereoscopic Exposure

We carry a full line of X-Ray and Physio-Therapy Equipment, including textbook by T. Howard Plank, M. D., "Actino-therapy and Allied Physical Therapy" and others.

Radium and X-Ray Therapy

Radium and Oncologic Institute

1052 West Sixth Street, Los Angeles

*This institution provides unexcelled equipment and facilities for the use of Radium, X-ray
and Allied Agents in the treatment of neoplastic and other appropriate diseases*

Radium Therapy—An adequate quantity of radium and complete emanation apparatus and appliances afford the facilities essential for modern technique in radium therapy.

Deep X-ray Therapy—Two complete 300,000-volt installations providing every facility for preliminary and post-operative Radiation and X-ray Therapy alone or in combination with other treatment.

Hospital Affiliations with several institutions, including a complete high voltage X-ray and Radium Therapy department in the Methodist Hospital amply provide for cases requiring hospitalization.

Radium Service—Radium applicators may be secured after consultation by the physician when advisable for his use in appropriate cases.

We desire to confer and cooperate with the medical profession, and welcome inquiries pertaining to this work

REX DUNCAN, M. D.

CALIFORNIA AND WESTERN MEDICINE, the Journal of our Association, in its present form, is made possible in part because of the generous cooperation of firms who believe that its pages can successfully carry a message concerning their products to a desirable group of present and future patrons.

The five thousand and more readers of CALIFORNIA AND WESTERN MEDICINE often have occasion to purchase articles advertised in this publication.

Other things being equal, it would seem that reciprocal courtesy and cooperation should lead our members to give preference to those firms who place announcements in our publication.

Cooperation might even go farther than that. When ordering goods from our advertisers mention CALIFORNIA AND WESTERN MEDICINE. By the observance of this rule a distinct service will be given your Association, its Journal and our advertisers.

PARKE, DAVIS & CO.'S.
TETANUS ANTITOXIN
*Minimum Risk of
 Serum Sickness*

WE HAVE made some noteworthy advancements in our refining and concentration processes for manufacturing antitoxins—removing more and more of the highly undesirable proteins and other constituents. Parke, Davis & Company's Tetanus Antitoxin is in the forefront not only with respect to concentration, limpidity, clearness and content of solid material, but also in the decided reduction in its anaphylactogenic and serum-sickness-producing constituents.

PARKE, DAVIS & CO.
 DETROIT, MICHIGAN

PARKE, DAVIS & CO.'S TETANUS ANTITOXIN IS INCLUDED IN N. N. R. BY THE COUNCIL ON
 PHARMACY AND CHEMISTRY OF THE AMERICAN MEDICAL ASSOCIATION

REVELATION

Tooth Powder

Never In Paste Form

CLEANLINESS without injury to tooth structure or tissues is the most essential necessity in a dentifrice.

INJURIOUS SUBSTANCES — as GLYCERINE, GRIT, CHLORATE OF POTASH, or any CORROSIVE COMPOUND—should not be incorporated in the manufacture of a dentifrice.

GLYCERINE is a depletant, it saps the moisture from the tissues, which naturally will recede, exposing the periodontal membrane, causing sensitiveness and bleeding. This moisture in the cellular tissue is essential to the healthy condition of the membrane.

REVELATION TOOTH POWDER is never in paste form and contains none of the above mentioned drugs. Give it a trial. Upon receipt of your card we will be pleased to mail you a can. We are sure the results will prove satisfactory and that you will not hesitate to recommend it.

August E. Drucker Company

2226 Bush Street

Diseases

Maltine
WITH COD LIVER OIL
—a preparation
preferred
by
many
physicians
to
cod liver oil
alone

As a disease preventative the value of cod liver oil is firmly established. In combination with Maltine, cod liver oil is easy of administration and assimilation. And Maltine contains in addition to mineral salts and soluble vegetable albuminoids, the essential protein elements of barley, wheat and oats.

Maltine with Cod Liver Oil is readily digested. It is a pure and dependable preparation, free from the unpalatable qualities of plain cod liver oil. When the digestive processes are weakened and nourishment is impeded, Maltine with Cod Liver Oil may be safely prescribed. As an adjunct to the dietary of infants and children, it is a food that may be generally used to advantage.

Steam Consumption

Linen

OR the modern laundry department where every foot of floor space counts. The 54-inch diameter Premier is the ideal washer! It takes but a fraction of the space required for a group of small capacity machines and steps up production to an efficient, economical basis! With less space allotted for washing purposes greater capacity can be obtained by the installation of 54-inch diameter Premier Washers.

A Troy representative will tell you the interesting story of this washer and give you accurate facts and figures on an installation in your laundry. There is no obligation. Write the nearest office today!

**SUPERIOR
NEOARSPHENAMINE**

Superior Neoarsphenamine, D. R. L. not only closely approximates the curative power of Arsphenamine but its extremely low toxicity is guaranteed to be uniform. This guaranty for Neoarsphenamine is noteworthy. Superior Neoarsphenamine, D. R. L. is not allowed to go to the physician unless it has been tolerated, by the test animal, at 400 milligrams per kilo of body-weight or

better, as against a governmental requirement of 240.

This gives you an added margin of safety of $66\frac{2}{3}\%$.

Here is a sort of Safety Insurance for which you pay a very slight premium and from which you secure large dividends that will be evidenced by the records of your office, making for economy in the cost of treatment based on minimum reaction and maximum results.

When a mother brings you an underweight, undernourished child....the addition of Knox *Sparkling* Gelatine to its milk will prove helpful in correcting the condition!

DO YOU know the facts about *gelatine-and-milk*?—how Knox Gelatine, when dissolved and added to milk, aids digestion and increases the available nourishment!

—Do you know the facts about *gelatine-and-vegetables or gelatine-and-fruit*? — that the child finds it more appetizing to eat plenty of fruits and vegetables when they are combined in delicious ways with Knox Sparkling Gelatine!

We believe these facts will help you in your important work with undernourished children.

May we send you the reports—the recommendations—made by authorities, under careful supervision?

KNOX GELATINE LABORATORIES
417 KNOX AVE., JOHNSTOWN, N. Y.

KNOX
SPARKLING
GELATINE

"The Highest Quality for Health"

From raw material to finished product Knox Sparkling Gelatine is constantly under chemical and bacteriological control, and is never touched by hand while in process of manufacture.

SLEEPLESSNESS, as a symptom, occurs in a great variety of cases. Unfortunately, most hypnotics lose their effectiveness quickly, and the dosage must be increased. IPRAL has been given to a great many individuals for the past several years, and so far it has been found necessary, in but very few cases, to increase the usual 4-grain dose to 6 grains. IPRAL is of particular advantage in mental or nervous cases attended with prolonged loss of sleep; its use in such cases has brought about apparently natural sleep, and has quieted the nervous symptoms to a great degree.

IPRAL is of value in treatment of drug habituation. One of the characteristics of this superior hypnotic is the fact that it not only produces sleep the night it is administered, but its sedative action persists so that as a rule the patient sleeps also on the following night, without additional medication. A patient who has previously found it necessary to resort to hypnotics is not only greatly improved, but highly elated when he finds that he is able to do without a hypnotic even for one night.

DOSAGE

As a sedative, or for ordinary insomnia, one or two IPRAL TABLETS (2 to 4 grains) are usually sufficient; as a hypnotic, two tablets (4 grains) are usually effective, although, according to Jackson and Lurie, as much as 15 grains may be given with absolute safety.

Colfax School for the Tuberculous

Colfax, California

(Altitude 2400 feet)

This institution is for the treatment of medical tuberculosis and of selected cases of extrapulmonary (so-called surgical) tuberculosis.

The Colfax School for the Tuberculous consists of five Hospital Units with beds for patients who come unattended and a Housekeeping Cottage Colony for patients and their families.

The Colfax School for the Tuberculous offers the following advantages:

1. Patients are given individual care by experienced tuberculosis specialists. The patient is treated according to his individual needs.
2. Patients are taught how to secure an arrest of their disease, how to remain well when once the disease is arrested, and how to prevent the spread of the disease.
3. Patients have the advantage of modern laboratory aids to diagnosis and of all modern therapeutic agencies.
4. The climate of Colfax enables the patient to take the cure without discomfort twelve months in the year. We believe climate is secondary to medical supervision and rest, but the fact remains that it is easier to "cure" under good climatic conditions than where these climatic conditions are absent.
5. Colfax is accessible. It is on the main line of the Ogden Route of the Southern Pacific R. R. and has excellent train service. It can be reached by paved highway, being on the Victory Highway, with paved roads all the way to Colfax.

Results of Treatment

Cooke, Vander Veer: Am. J. Med. Sci.,
Jul. '27, P. 101

(Cooke and Vander Veer used their
own pollen extracts)

Good results may be expected in the treatment of Hay Fever if fresh, potent pollen extracts, high in pollen unit content, are used.

Cutter's pollen extracts are prepared fresh each season. Containing 60,000 pollen units they are the "strongest" pollen extracts obtainable. Cutter's treatment set is a 25 to 30 dose package and should not be confused with 15 dose treatment sets.

The Cutter Laboratory

Established 1897

Berkeley, California

for spring colds which hang on

Stubborn Coughs

which hang on as the season changes demand effective treatment.

Calcreose

and Compound Syrup of Calcreose are particularly valuable in these cases.

Calcreose

offers the full expectorant action of creosote without most of the disagreeable gastric disturbances produced by plain creosote.

Try Calcreose!

It is a loose chemical combination of creosote and hydrated calcium oxide from which the creosote is slowly released.

Also . . . a valuable remedy in Enteritis

Sample of Tablets to Physicians on Request.

ALUM ROCK SANATORIUM

FOR THE TREATMENT OF TUBERCULOSIS IN ALL ITS FORMS

The Sanatorium adjoins Alum Rock in the eastern foothills of San Jose, 900 feet above sea level, and overlooks the entire Santa Clara Valley. The climate is ideal throughout the year. The distance from San Francisco by rail or motor is fifty miles. The buildings are situated in the center of a beautiful ten-acre tract under cultivation. A hedge of eucalyptus partly surrounds the place and there is a great variety of flowering shrubs, citrus and pine trees. The aim of the staff is to give tuberculosis patients intensive individual treatment and each case will be carefully studied with this end in view.

Odor
Has
Gone"*

This is a statement made by the manager of one of
the Pacific Coast's largest hospitals, with reference
to Hexol, which has been in use in this great institu-
tion since December, 1926.

Hexol is used in the surgery (for sterilizing
instruments), in maternity (as a pour and in the
baby's bath) and for many heretofore unthought
of uses when toxic and caustic germicides were the
only ones known.

In one year Hexol has been adopted by 70 per
cent of the hospitals in four counties in California.

ASHCRAFT THERAPEUTIC ARC LAMP

(Automatic)

EXCLUSIVE Ashcraft Features

Produces 30 Amps. at the arc.
 Uses a transformer.
 Has a motor driven automatic carbon feed.
 Registers arc amperage.
 Permits radiation without a protection screen with safety.
 Carbons never clash during treatment.
 Cannot be put out by rough handling or jarring.
 Positively maintains a set amperage and intensity under any conditions.
 Burns carbons to within 1 inch.
 Consumes the least line current.
 Utilizes all current drawn from the line—no wastage through resistance coils.
 Impossible to break carbons.
 Carbons replaced from outside.
 Carbons burn for 6½ hours.
 Produces 12 to 25 times more ULTRA-VIOLET than any other Therapeutic Carbon Arc Lamp using A. C. current.
 Lowest maintenance cost.

For Medicinal, Industrial and Drinking Purposes

"The world needs not so much to be informed as to be reminded!"

Our bookkeeper fails to find your account settled on our books. Please help him out.

PAST DUE!

This Account has no doubt escaped your notice. Will you please favor us with a remittance by return mail and oblige?

**THIS ACCOUNT
IS PAST DUE.
PLEASE REMIT.**

Regarding Your Past-Due Account

Our records show that several statements and reminders have been sent you regarding the enclosed statement.

If your circumstances have made it impossible for you to pay the amount due, kindly write us promptly to that effect. Our office will then endeavor to extend all possible courtesies.

You appreciate, we are sure, that physicians, like other citizens, must pay their bills promptly. They can only do so, however, when their own clients in turn pay them promptly for such professional services as may have been rendered.

A check to cover your account, which is now considerably overdue, will be appreciated.

Final Notice

In practically all businesses the custom which is generally followed with overdue accounts is to send such to a collecting agency.

Our bookkeeper has nothing in the records of the office to show when you intend to pay the enclosed account. Perhaps the previous statements and reminders may have been overlooked or ignored.

Following the rule of this office, this overdue account will be sent to the collecting agency within ten days if arrangements for its settlement are not made prior to that time.

This collection bureau method is disagreeable to us; and we believe, also to you. By promptly sending your check all this can be avoided.

When an account is sent to the collecting agency that organization takes full charge of it thereafter.

IN THE "Miscellany" section of the September, 1927, issue of CALIFORNIA AND WESTERN MEDICINE, page 398, appeared an article relating to the "collection of fees." Following this publication, numerous orders for printing the series of gum stickers and notices as shown in the article were received by us. We therefore concluded to stock them.

Since first we put the series on the market as a stock item, the demand has grown so great that we have been compelled to print them in much larger quantities. This volume-printing has enabled us to produce them at a considerable reduction over the first printing and we are pleased to pass the saving on to the profession.

The prices quoted below are for the complete series—three gum stickers and two notices, as reproduced in this ad. The price includes postage:

250.....	\$ 6.75
500.....	9.00
1000.....	13.50

We shall be pleased to quote you on any other piece of printed matter for which you may be in the market.

STREAK LIGHT RETINOSCOPY

STREAK LIGHT RETINOSCOPY has revolutionized objective Refraction. The "Shadow Test" is now almost an exact science. Dr. J. C. Copeland's Simplified Technique is one of the greatest contributions to the refractionist.

That the principles are sound and practical is evidenced by the instruments now being made, which incorporate the features of the original Copeland Refractascope; but with no instrument except the Refractascope is the Copeland Technique to be had.

STREAK LIGHT RETINOSCOPY IS DIFFERENT

The Copeland Method of Retinoscopy is the simplest of all retinoscopic procedures. It is necessary to understand the basic theory, however, if the wonderful results of Streak Light Retinoscopy are to be obtained.

START RIGHT

If you are interested in this new system of retinoscopy, procure the original instrument and the Copeland course. The course alone is worth the price.

The Copeland 15-lesson course in Advanced Retinoscopy

Here you can see the modern laundry department—completely “American” equipped, of course—that is helping to keep down the overhead for the Santa Clara County Hospital.

A modern hospital laundry at Santa Clara, California

THIS completely equipped “American” laundry department is helping the officials of Santa Clara County Hospital, Santa Clara, Cal., to keep down the overhead—day after day, and week after week.

For, in this modern laundry, the hospital linens are washed immaculately clean, ironed perfectly and returned to service so promptly that a much smaller reserve stock is needed.

Surely at one time or another you have given some thought to the possibilities of such a profitable department in your hospital. So you will be glad to know that The American Laundry Machinery Company maintains a staff of specialists in hospital laundry practice. A letter will bring one of these men to your office, to talk things over. And, of course, his visit will not obligate you in any way. Write.

AMERICAN HAY FEVER

All Sections—NORTH—EAST—SOUTH—WEST—All Seasons

Adequately and accurately covered by
ARLCO-POLLEN EXTRACTS
for Diagnosis and Treatment

AN ARLCO-POLLEN COLLECTOR

TREE HAY FEVER

can be accurately identified by skin test with the pollens of locally prevalent trees and thereby differentiated from the "common colds" of early spring.

GRASS HAY FEVER

begins about the time *tree hay fever* ends, viz. May 15th, and need not be confused with the earlier appearing and sometimes overlapping *tree hay fever*.

WEED HAY FEVER

—August to frost—is unrelated to the previously occurring *grass hay fever* and is occasioned, according to the locality, by such late pollinating plants as the Ragweeds — Russian Thistle — Western Water Hemp — Carelessweed — or Sage Brush.

LIST of pollens for any section—any season—with commentary circular discussing the treatment of hay fever by *preseasonal* or *coseasonal* method, with respective schedules of dosage—sent on request.

Six Years Of Iletin (Insulin, Lilly)

Iletin (Insulin, Lilly) is backed by six years of experience in research and production. It was the first preparation of Insulin commercially available in the United States. In the minds of diabetes specialists, the name "Insulin" is very closely associated with the name "Lilly," which has been linked with scientific medicine and quality products for more than a half century.

Iletin (Insulin, Lilly) has given good results in the past on account of its uniformity in purity and unitage. It may be relied upon to give uniformly satisfactory results in the future.

Send for literature on the Treatment of the Uncomplicated Case of Diabetes Mellitus by the General Practitioner; the Treatment of Diabetes Mellitus, together with Diet Calculation and the Use of Insulin; Diabetes, its Prevention and Treatment, and Items of Interest to Physicians Using Iletin (Insulin, Lilly).

ELI LILLY AND COMPANY

Radiant Heat Therapy with the Victor Thermospectral Lamp

A Duplex Outfit Using the Incandescent Bulb and Infra-Red Unit Interchangeably

WITH the countless number and varieties of so-called therapeutic heat lamps on the market, advertised to both the medical profession and the public, little wonder that many physicians are at a loss when it comes to the selection of an outfit for the office or clinic.

Just as a correct drug prescription requires a knowledge of the action of the drugs prescribed, so does the intelligent use of any physical therapeutic energy require a knowledge of the nature of that energy. Eminent physicists deplore the fact that more accurate data have not been given in many investigations, especially pertaining to the wave-

lengths of radiant energy employed and the too frequent use of indefinite terms in describing results. In other words, reported clinical results with radiant energies are distinctly valuable only when the spectral limits and the spectral distributions of the energy employed have been definitely determined.

It is on this basis that the Victor Thermospectral Lamp is presented. It is virtually two outfits in one, in that the incandescent bulb and infra-red unit may be used interchangeably. The spectral ranges of the two energies derived are as follows:

	Spectral Range (Angstrom Units)	Dominant in Region of (Angstrom Units)
1500 Watt Incandescent Tungsten Filament Bulb (Nitrogen Filled)	4000A—25000A	9000A—11000A
1000-Watt Infra-Red Unit	7600A—150000A	20000A—30000A

The Victor Thermospectral Lamp is scientifically designed for a specific range of therapeutic service and is submitted to the profession as a legitimate unit in the physical therapeutic armamentarium.

Write for Bulletin No. 281 for complete description

LIVERMORE SANITARIUM

The Hydropathic Department devoted to the treatment of general diseases excluding surgical and acute infectious cases. Special attention given functional and organic nervous diseases. A well equipped clinical laboratory and modern X-ray Department are in use for diagnosis.

The Cottage Department (for mental patients) has its own facilities for hydropathic and other treatment. It consists of small cottages with homelike surroundings permitting the segregation of patients in accordance with the type of psychosis. Also bungalows for individual patients, offering the highest class of accommodation with privacy and comfort.

GENERAL FEATURES

1. Climatic advantages not excelled in United States. Beautiful grounds and attractive surrounding country.
2. Indoor and outdoor gymnastics under the charge of an athletic director. An excellent Occupational Department.
3. A resident medical staff. A large and well trained nursing staff so that each patient is given careful individual attention.

ULTRAVIOLET *in the Treatment of* OTITIS MEDIA

References: Dr. I. O. Denman, Ear, Nose and Throat Monthly, March 1923 and January 1926. Dr. H. Gerstenberger, Amer. J. of Diseases of Children, Oct. 1922, p. 320. Dr. J. Zahorsky, Mo. State Med. Jour., Feb. 1925. Drs. A. R. Hollender and Maurice H. Cottle, Amer. J. of Phys. Therapy, Apr. 1925, and Eye, Ear, Nose and Throat Monthly, Feb. 1925.

THE increasing precision of ultraviolet therapy is fostered by the mechanical perfection of the Kromayer quartz mercury vapor arc lamp. This water cooled lamp is contained in a light, compact casing scientifically designed to provide the utmost convenience in the treatment of localized areas, compression irradiation and focused application to orificial conditions.

As an *efficient weapon* in the medical armamentarium, it provides a high concentration of ultraviolet in the most effective therapeutic intensity. Always ready for use, with no adjustment other than the maintenance of water flow, simple to operate, and free from any noxious emanations.

The Kromayer Lamp is offered in a series of models which meet every office requirement of general practitioner or specialist... with a range of quartz applicators carefully developed in clinical practice.

Prescribe **DRYCO** *The Irradiated Milk*

NOT only for well babies, but particularly for those unable to digest other forms of milk, Dryco has proven of inestimable value. This fact has earned for it many years of enviable prestige with physicians all over the world. They know from experience that it can be depended upon for good results

In addition to its many other advantages, Dryco is highly antirachitic, due to irradiation by the ultra violet ray. It is the only irradiated milk available.

Separate enlargements of this engraving and "Habit Time" mailed free on request.

In managing colon troubles it is important to restore normal fecal consistency.

PETROLAGAR

- provides normal fecal consistency.
- forms an homogeneous mixture with intestinal contents.
- produces normal physiological reaction on secretory and motor functions of the bowel.
- mechanically protects the membrane as does mucus.

Petrolagar is an emulsion of mineral oil with the indigestible emulsifying agent—agar-agar.

New and Interesting Engeln Equipment

THE new Engeln Motor Driven Tilt Fluoroscopic Table illustrated above with No. 6 Rail Mounted Tube Stand is commanding unusual attention and interest. This table represents a great many distinct improvements in its unusually rigid construction and wider range of Fluoroscopic vision—furnished complete with counter-balanced flat Bucky Potter Diaphragm if desired.

The photographs at the right illustrate the new 107,000 volt capacity transformer and control. The new Kenotron Tube type of rectification is incorporated into this equipment with the entire rectifying assembly oil immersed in the transformer tank. As shown in lower photograph, the rectifying tube assembly is easily accessible and the terminal panel of the control unit is complete and conveniently arranged.

The many interesting features of these and other new types of Engeln apparatus are fully explained in descriptive bulletins which will be mailed at your request.

APPROVED CLINICAL LABORATORIES

Excerpts from American Medical Association Essentials for An Approved Clinical Laboratory

Definition

"* * * A clinical pathologic laboratory is an institution organized for the practical application of one or more of the fundamental sciences by the use of specialized apparatus, equipment and methods, for the purpose of ascertaining the presence, nature, source and progress of disease in the human body."

"Only those clinical laboratories in which the space, equipment, finances, management, personnel and records are such as will insure honest, efficient and accurate work may expect to be listed as approved."

"The housing and equipment should be sufficient to permit all essential technical procedures to be properly carried out."

The Director

"The director of an approved clinical laboratory should be a graduate of an acceptable college or university of recognized standing, indicating proper educational attainments. He shall have specialized in clinical pathology, bacteriology, pathology, chemistry or other allied subjects, for at least three years. He must be a man of good standing in his profession."

"The director shall be on full time, or have definite hours of attendance, devoting the major part of his time to the supervision of the laboratory work."

"The director may make diagnoses only when he is a licensed graduate of medicine, has specialized in clinical pathology for at least three years, is reasonably familiar with the manifestation of disease in the patient, and knows laboratory work sufficiently well to direct and supervise reports."

"The director may have assistants, responsible to him. All their reports, bacteriologic, hematologic, biochemical, serologic and pathologic should be made to the director."

Records

"Indexed records of all examinations should be kept. Every specimen submitted to the laboratory should have appended pertinent clinical data."

Publicity

"Publicity of an approved laboratory should be directed only to physicians either through bulletins or through recognized technical journals, and should be limited to statements of fact, as the name, address, telephone number, names and titles of the director, and other responsible personnel, fields of work covered, office hours, directions for sending specimens, etc., and should not contain misleading statements. Only the names of those rendering regular service to the laboratory should appear on letter-heads or other form of publicity."

Fees

"* * * There should be no dividing of fees or rebating between the laboratory or its director and any physician, corporate body or group. * * *"

The following laboratories in California are among those approved by the Council on Medical Education and Hospitals of the American Medical Association:

**Clinical Laboratory of Drs. W. V. Brem, A. H. Zeiler and R. W. Hammack,
Pacific Mutual Bldg., Los Angeles, Calif.**

Clinical Laboratory of Drs. Evans, Butka, and Pratt, 1052 W. Sixth St., Los Angeles, Calif.

Pasadena Clinical Laboratory, 65 N. Madison Ave., Pasadena, Calif. Gustav F. Ruediger, M. D., Director.

X-Ray and Pathological Laboratory, 203 Medico-Dental Bldg., Stockton, Calif. C. D. Holliger, M. D., F. B. Sheldon, M. D., Directors.

These laboratories use only standard methods and are fully equipped with the most modern apparatus to make all clinical examinations of value in: Pathology (frozen sections when ordered), Bacteriology, Chemistry, Hematology, Serology, Medico-legal, Basal metabolism, Blood chemistry, Autogenous vaccines and all other laboratory aids in diagnosis.

Tubes and mailing containers sent on request.
